

## NEW OPEN SLA TECHNOLOGY WITH VARIABLE SPOT SIZE

After working with the 3D printing technology for several years and thereby gaining experience on the subject and the market, TECCLUSTER has decided to introduce their own brand of 3D printers – “TECCAM”.

Specifically designed and developed by Danish engineers in different models and sizes. The printers are designed after the tradition of Danish design including high quality, functionality, and with a uniquely small footprint.

TECCAM printers are open for all materials making TECCAM printers innovative and cost effective with high scanning speed, extreme precision and stable fundamentals.

Certified by TÜV.

TECCAM printers are best value in the market with modern technology and innovative design.

## About US

In recent years 3D printers have become the technology that all companies would like to explore and invest in.

TECCAM has been working with this technology from the early days and has a great amount of experience on the subject.

When it comes to 3D printers TECCLUSTER should not be excluded.

TECCAM is one of Scandinavia's leading suppliers of 3D technology, providing 3D printers, scanners, software and materials.

TECCAM was founded in 2003. Ever since, TECCLUSTER has been awarded several times. Amongst these awards are:

- *Company of the Year*
- *EY Special Award Nominee, IT-Forum*
- *5 time Gazelle award winner*
