

Amazing new 3D Printers

TECCAM F1800

All TECCAM FGF 3D Printers melt plastic granulates or plastic pellets and then feed them through the nozzle.

The TECCAM F1800 model is excellent for businesses and for the production line as is designed to print large objects, fast, and it has open access to multiple materials.

System Features

- Fast printing speed
- Open access
- Large printing format

Technical data

Build Size	1800x1300x1300mm
Machine Size	2662x1950x2610.6mm
Working Surface Temperature	≤120°C
Optional Nozzle Diameter	1-8mm
Nozzle Heating Method	Three-zone intelligent heating
Max. nozzle temperature	≤350°C (450°C is optional)
Material Particle Diameter	1-5mm
Storage hopper volume	50kg
Table Contact Surface	Magnetic platform
Slicing Supported Formats	STL, OBJ, AMF, 3MF
Rated Power	10kW
Electricity Requirements	Single-phase AC 220V
Machine Weight	1300kg
